

Designed to operate from frigates, capable of any naval mission.

The primary weapon system in the defense of a surface fleet. Operating from vessels with an integrated mission system allowing autonomous and joint ASW, ASuW, SAR and C-SAR operations. The NH90 is a valuable long-term asset that can support operations for years to come. An evolving platform with capabilities adapting to the latest threats and missions.

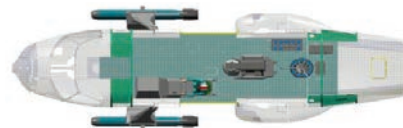

NH
90

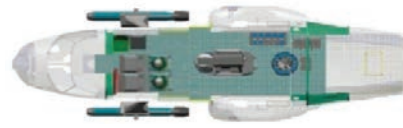

Multi - Missions capability

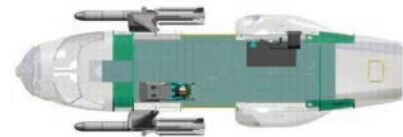

ASW 3 crew concept

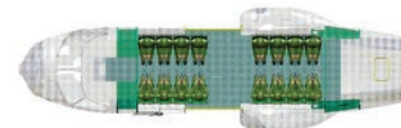

ASW 4 crew concept

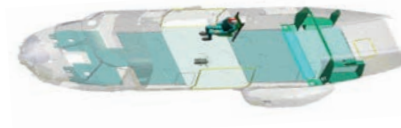

ASuW

Troop Transport

VERTREP

Anti-Piracy, Maritime Counter Terrorism

Maritime capabilities

- Composite design enhances corrosion resistance, survivability and minimizes radar signature;
- Fly By Wire system for increased safety and enhances survivability and maneuverability;

- State of the art HMI for optimized crew performance, reduced workload & safety.
- Designed under FAR29 airworthiness requirements

Operational capabilities & weapons

- Same footprint as its closest competitor, twice the cabin's surface and volume;
- Designed, built and optimized for maritime operations;

- 2 x Anti-Ship Missiles
- 2 x Torpedoes
- Pintle machine guns

NH90 NFH NATO FRIGATE HELICOPTER

- Reliable**
- High redundancy fly by wire**
- Combat centric or stand alone**
- Unmatchable flight envelope**
- Major interoperability**
